

## **WATERFORD**

Waterford mixed and matched patterns and shapes, giving each combination, in most cases, a different name.

Before going into receivership, Waterford introduced the Marquise Range which was made on the continent. They later made their main range outside Europe in factories they owned [including Stuart]. The country was named on the box. We do not stock the Marquise range or glasses currently made for Waterford.

We have in stock some items in the following designs. Please contact us concerning any specific item you are looking for. If they are unavailable, we are happy to look for them. We keep customers on the search list for three years unless instructed otherwise.
