

THOMAS WEBB

The patterns we have in stock relate mainly to the period before the name was sold to Waterford. The Thomas Webb International range is all imported. The pattern books show a huge variety of patterns in cut glass, many dating to the late 19thC. However those available from the 1950's seem to be limited in number and possibly most of the others were special order only. Expect slight variations in bowl shape and stem in patterns such as Normandy, Wellington and Royal Yacht which were hand made for over 80 years.

Below is a list of designs which we have in stock. Please contact us concerning any specific item or design required. If unavailable we are happy to look for it. We keep a search list for up to 3 years unless you wish otherwise.
